SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

Industry – Renewable Energy

Executive Summary

1. Immense Growth Potential

India has low conventional energy resources compared to its required energy needs driven by a huge population and a rapidly increasing economy. However, India can harness the huge potential of solar energy as it receives sunshine for

most of the year. It also has vast potential in the hydro power sector which is being explored across states, especially in the northeast.

As of November 2022, India's installed renewable energy capacity (including hydro) stood at 165.94 GW, representing 40.6% of the overall installed power capacity and providing a great opportunity for the expansion of green data centers. India is the only country among the G20 countries who is on track to achieve its targets under the Paris Agreement. ICRA expects renewable energy capacity addition of 12.5 GW in FY22 and 16 GW in FY23.

2. Ambitious Targets

In November 2021, at the Cop-26 Summit in Glasgow, Prime Minister Mr. Narendra Modi made a promise to increase India's renewable energy generation capacity to 500 GW, and meet 50% of India's energy needs through renewable means by the year 2030.

The non-hydro renewable energy capacity addition stood at 4.2 GW for the first three months of FY23 against 2.6 GW for the first three months of FY22.

3. Increasing Investment

The non-conventional energy space in India has become highly attractive for investors and received FDI inflow of US\$ 12.57 billion between April 2000- June 2022. More than Rs. 5.2 lakh crore (US\$ 70 billion) has been invested in India's renewable energy sector since 2014. India ranked third on the EY Renewable Energy Country Attractive Index 2021.

3. Some risks may not be material at present but may have a material impact in the future.

INTERNAL RISK FACTORS:

1. **We do not own the premises in which our registered office and back office is located and the same is on lease arrangement. Any termination of such lease/license and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.**

Following are the details of our rented premises:

Sr. No.	Name of Lessor	Name of Lessee	Address of Property	Usage Purpose	Area	Rent	Tenure
1.	Pragnyaben Jigarbhai Patel and Nityaben Bhavinbhai Patel	Ahasolar Private Limited	207, Kalasagar Mall, Nr. Sattadhar Cross Road, Ghatlodia, Ahmedabad, 380061 Gujarat India.	Registered Office	2525 Sq. Ft.	₹ 93,255/- per month	24 months from May 01, 2022
2.	Mrs. Vashila Kalyanji Dholu	Ahasolar Technologies Limited	209, Kalasagar Mall, Nr. Sattadhar Cross Road, Ghatlodia, Ahmedabad, 380061 Gujarat India.	Back Office	2525 Sq. Ft.	₹ 80,800/- per month	11 Months from February 01, 2023

Upon termination of the lease, we are required to return registered office premises to the Lessor/Licensors, unless it is renewed. There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Licensors terminates or does not renew the agreements, we are required to vacate our registered office business where administrative activities are carried out. We may be required to identify alternative

premises and enter into fresh lease or leave and license agreement at less favorable terms and conditions. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability.

2. *The Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.*

Our top Ten customers Contributes 32.57%, 52.78%, 87.97% and 89.89% of our total sales for the period / year ended on March 31, 2023, March 31, 2022, March 31, 2021, and March 31, 2020 respectively. Our Company is engaged in the business of CleanTech enabling Energy Transition through Digital Transformation and henceforth empowering stakeholders to adopt renewable energy. Our Company do this through multiple digital solutions and advisory in the field of renewable energy. Our revenue from AHA Marketplace being trading vertical, advisory vertical is derived from contracts acquired by bidding open tenders. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

3. *Majority of our revenue from operations is derived from AHA Market and our financial performance may be adversely affected by an inability to generate income from such activities.*

The primary drivers of our revenue from operations is various products and services available on AHA Market, and the volume achieved of such fees and commissions. The fees and commissions we receive can depend upon a number of factors that are, in part, within our control, which can include our overall business strategy, our expenses related to a particular transaction type, the volume of transactions for a product or service (where the greater the number of expected transactions will typically result in us setting a smaller fee or commission, and vice versa), or promotions that we may be running at any given time. Further, they are also dependent upon a number of external factors, which can include general macro-economic conditions, the market value of certain infrastructure, the supply or demand for a product and service, regulatory instructions, competitive factors with certain other fintech companies, Financial Institutions and other companies within certain product/service lines. Competitive factors in particular, have and may continue to have an adverse effect on our ability to charge higher fees and commissions to improve our margins.

In addition, due to us charging our fees and commission primarily on per transaction basis, the volume of transactions that we record is a primary driver of our revenue. The volume of transactions depends upon a number of factors that are, in part, within our control, which can include the number of and availability of customer touchpoints, the usability of our customer facing technology and the reliability and capacity of such technology to handle volumes of transactions and our marketing efforts.

Further, the volume of transactions also depends upon a number of external factors, which can include general macro-economic conditions, critical technology and power infrastructure, government initiatives regarding financial inclusion, digitization of transactions and payments in India, changes in general banking activity and competition. If we are unable to manage and plan for the factors within and out of our control, we may not adequately set our fee and commission structure to cover all or some of our costs or miss revenue generating opportunities, or even where adequately set, we may miss opportunities to increase volume, each of which may adversely affect our business, financial condition, results of operations and cash flows.

4. *One of our business verticals is a high volume-low margin business.*

Our revenues derived from AHA Marketplace is a high-volume low margin business. We may need to generate higher volume in terms of quantity to increase our profitability. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability from the said business vertical and hence adversely

affect our operating results, debt service capabilities and financial conditions. Due to the nature of our business, we may not be able to charge higher margins on our products. Hence, the said business vertical is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to procurement of traded goods, timely sales, order execution and continuous cost control of non-core activities. For further details regarding the discussions and explanations for our past results, please refer to the chapter titled “*Management’s Discussions and Analysis of Financial Information*” beginning on Page No. 148 of this Prospectus.

5. *Our business is highly dependent on technology and any disruption or failure of our technology systems may affect our operations.*

We rely on our information technology systems to provide us with connectivity across our business functions and connectivity with our agents through our software, hardware and network systems. Our business processes are information technology enabled, and any failure in our information technology systems or loss of connectivity or any loss of data arising from such failure could disrupt our ability to track, record and analyse work in progress, monitor maintenance activities or share data with our network partners, process financial information, manage creditors/debtors or engage in normal business activities, which could have an adverse effect on our business and operations. Further, any failure, disruption or manipulation of our integrated information technology system could disrupt our ability to track and record transactions, which could have an adverse effect on our business and operations.

In addition, our success will depend, in part, on our ability to respond to and keep pace with new technological advances and emerging banking and consumer trends and other financial services industry standards and practices in a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction processing systems to customer requirements or improving market standards. Our information technology systems are subject to potential internal and external weaknesses, disruptions and failures such as damage or incapacitation by human error, natural disasters, electrical or telecommunication outages, nation/ region-wide interruptions in the infrastructure, sabotage, computer viruses, hacking, cyber-attacks or similar events, or loss of support services from other third parties, or failures to timely upgrade our information technology systems.

6. *Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.*

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Our Company is required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. For details, please refer to chapter titled “*Government and Other Approvals*” beginning on Page No. 160 of this Prospectus.

7. *Our individual Promoters plays key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.*

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years built relations with various customers and other persons who form part of our stakeholders and are

connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

8. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our registered office, from where we operate, is not insured. However, in opinion of board, we are not prone to risks associated with our several businesses, such as loss or damage by fire, theft and robbery considering nature of our business. We believe we have got our assets and employees adequately insured; however, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, to cover all material losses. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected.

9. *Our failure to perform in accordance with the standards prescribed in work order of our client could result in loss of business or compensation payment.*

We received work orders from our clients. Majority of these work orders may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain work order may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

10. *Our ability to attract, train and retain executives and other qualified employees is critical to our business, results of operations and future growth.*

Our business and future growth is substantially dependent on the continued services and performance of our key executives, senior management and skilled personnel, especially personnel with experience in our industry. In particular, our executive directors and our senior management are critical to the overall management of our Company. Their input and experience are also valuable for the development of our services, our work culture and the strategic direction taken by our Company. Further, our business depends upon our employees for its successful execution. Some of our key management has been with our Company for a long time; however, any of them may choose to terminate their employment with us at any time. We cannot assure you that we will be able to retain these employees or find equally qualified and experienced replacements in a timely manner, or at all. The specialized skills we require, especially for our divisions like Advisory Services, can be difficult and time-consuming to acquire and/or develop and, as a result, such skilled personnel are often in short supply. We may require a long period of time to hire and train replaced personnel when skilled personnel terminate their employment with our Company. Our ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees. We may be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. If we do not succeed in attracting well-qualified employees or retaining or motivating existing employees, our business and prospects for growth could be adversely affected.

11. *Our investments in human capital and technology may not yield the intended results.*

We invest in and intend to continue investing in human capital to enhance our technical capabilities, particularly with a view to entering into new geographies. Our focus areas currently include developing integrated digital transformation frameworks based on fintech applications, for the sector of our focus. We combine industry knowledge with our technical knowledge. Our choice of focus areas and investments in technology and human capital are based on the management's perception of the sectors in which we operate. We cannot assure you that such investments will yield the intended results. The inability of our company to achieve intended results from its investments in technology and human capital may adversely impact our cash flows and results of operations.

12. *Our Company requires significant amount of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.*

Our business requires significant working capital, part of which would be met through additional borrowings in the future. In many cases, significant amounts of working capital are required to finance the procurement of branded products before payments are received from customers. Our working capital requirements may increase, under certain conditions, where payment terms do not include advance payments or include delayed payments from customers. Additionally, our working capital requirements have increased in recent years due to the general growth of our business. All these factors may result, or have resulted, in increases in our working capital needs. The details of working capital requirements are as follows:

13. *Our Company had negative cash flow from operating activity in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

The detailed break up of cash flows based on Restated Standalone Financial Statements is summarized in below table and our Company has reported negative cash flow from operating activity in the financial years is as mentioned below, which could affect our business and growth:

(₹ in Lakhs)

Particulars	For the year ended March 31			
	2023	2022	2021	2020
Net Cashflow from operating Activities	(21.76)	32.08	10.37	(19.66)

14. *Inability to effectively manage our growth and related issues could materially and adversely affect our business and impact our future financial performance.*

During the past few years, we have experienced consistent growth in our business operations. This has occurred through organic growth. Our rapid growth exposes us to a wide range of risks including business risks, operational risks, fraud risks and regulatory and legal risks. If we are not successful in executing our growth strategy, we may not achieve our planned revenues, therefore negatively impacting future profitability. Our growth strategy may involve significant risks which may have a material adverse effect on our business due to unexpected or underestimated costs. The Company's

ability to continue to grow consistently will depend on and a number of factors beyond its control, including the level of competition for opportunities for inorganic growth and our ability to successfully manage our organic growth.

15. *Client contracts are generally of a short duration and contain termination provisions that could decrease our revenues and earnings.*

Most of our client contracts can be terminated by the client on short notice without penalty. Majority of our client contracts are for a period of 12 months to 36 months. Our clients, therefore, are not contractually obligated to continue to do business with us in the future. This creates uncertainty with respect of revenues and earnings from our client contracts.

16. *Clients may delay or default in making payments for services which could affect the cash-flows and liquidity of the Company.*

Cash collection trends measured by days outstanding have a material impact on the cash receipts and, consequently, on our cash flows. In general, an increase in bad debts or aged debtors leads to greater usage of operating working capital and increased interest costs. Trade receivables constitute a significant portion of our assets and are, therefore, a major business investment. Successful control of the trade receivables process demands the development of appropriate contracting, invoicing, credit, collection and financing policies. Our failure to maintain such policies could have a negative effect on its business, financial condition and results.

17. *We may be liable to our clients for damages caused by system failures, disclosure of confidential information or data security breaches, which could harm our reputation and cause us to lose clients.*

Our contracts are critical to the operations of our clients' businesses and provide benefits to our clients that may be difficult to quantify. Any failure in a client's system could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Also, we face a number of threats to our network, unauthorized access, security breaches and other system disruptions. It is critical to our business that our infrastructure remains secure and is perceived by customers to be secure.

We seek to rely on authentication technology from third parties to provide the authentication necessary to effect secure online transaction. Despite our security measures, advances in computer capabilities, new discoveries in the field of cryptography may result in a compromise or breaches of the algorithms that we use to protect sensitive customer transaction data. Breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of confidential customer data could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, or cause interruptions in our operations. We may be required to allocate significant capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish our brand name.

18. *There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies.*

In the past, our company has filed forms in RoC with some clerical mistakes. Further we have at several instances, delayed in filing our GST returns mainly due to timely non available of populated data in the portal as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes. Although the late filing fees levied are small if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure you that we may not do delay filings in future and not be subjected to penalty or interest. 21. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.

Our Promoter's average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)*
1.	Mr. Piyushkumar Vasantlal Bhatt	2,12,905	1.4563
2.	Mr. Pulkit Dhingra	5,64,224	1.4564
3.	Mr. Shatrughan Harinarayan Yadav	1,48,986	1.4549
4.	Mr. Vipin Sharma	2,12,905	1.4563

*The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire and Shares allotted to them as reduced by amount received on sell of shares i.e. net of sale consideration is divided by net quantity of shares acquired.

22. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover,

the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

23. *Our revenues and profitability vary across our business verticals, thereby making our future financial results less predictable.*

Our revenues and profitability vary across our verticals. Our results of operations may fluctuate in the future depending on a number of factors, including but not limited to:

- Our ability to increase and/or maintain the proportion of our high-margin business verticals compared to the proportion of our relatively thin margin verticals;
- entering into new contracts and contract renewals, and the selection process and timing for performing these contracts that are subject to contingencies beyond our control;
- the size, complexity, timing of revenue recognition, pricing terms and profitability of significant contracts;
- changes in our pricing policies or those of our competitors;
- financial condition or business prospects of our clients;
- unanticipated variations in the duration, size and scope of our contracts;
- seasonal changes that may affect the demand for our services, the mix of services or the relative proportion of services revenue from our various business segments within a reporting period; and
- Unanticipated cancellations or contract terminations.

As a result of these factors, our results of operations and cash flows may fluctuate from financial reporting period to period. A significant proportion of our operating expenses, particularly full time employee expenses, are fixed. As such, unanticipated variations in key contracts may result in variations in our results of operations in any particular financial period.

24. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoters and Promoter Group will collectively own 36.95% of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

25. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

26. *Industry information included in this prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the

Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

27. *Within the parameters mentioned in the chapter titled “Objects of this Issue” of this prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use a substantial portion of the Net Issue Proceeds to meeting the working capital requirement and development of Solar PV Plant. We intend to deploy the Net Issue Proceeds in the financial year 2023-24 and 2024-25 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” beginning on Page No. 65 of this Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” beginning on Page No. 65 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

28. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled “Object for the Issue” beginning on Page No. 65 of this Prospectus.

29. *Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.*

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer chapter titled “Objects of the Issue” beginning on Page No. 65 of this Prospectus.

30. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

31. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

32. *Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

33. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also have to comply with the provisions of the listing agreement to be signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. The failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

EXTERNAL RISK FACTORS

34. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing "shelter-in-place" rules and "stay-at-home" orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations. In case where such situations arise in future, it may affect our financial operations.

35. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager has appointed Sunflower Broking Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

36. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and traded on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

37. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

38. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

39. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

40. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

41. Global economic, geopolitical, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic, geopolitical and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

42. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

43. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

The Covid-19 pandemic had brought the world to a standstill, affecting all sectors and the livelihood of many are at stake including the Indian economy. However, our Country has achieved normalcy by various measures taken by the Government. Further, our Country in the past has experienced natural calamities such as earthquakes, tsunami, floods etc. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

44. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

GLOBAL OUTLOOK

Global growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income—only three years after emerging from the pandemic-induced recession of 2020. Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it, including across major advanced economies (figure 1.1.A). Although this tightening has been necessary for price stability, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. This drag is set to deepen given the lags between changes in monetary policy and its economic impacts, and the fact that real rates are expected to continue to increase.

Asset prices have been in broad, synchronous decline, investment growth has weakened substantially, and housing markets in many countries are worsening rapidly. Shockwaves continue to emanate from the Russian Federation’s invasion of Ukraine, especially in energy and other commodity markets. Against this backdrop, confidence has fallen precipitously. The world’s three major engines of growth—the United States, the euro area, and China—are undergoing a period of pronounced weakness, with adverse spillovers for emerging market and developing economies (EMDEs), many of which are already struggling with weakening domestic conditions.

Global inflation has been pushed higher by demand pressures, including those from the lagged effects of earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. In some countries, inflation has also been spurred by large currency depreciations relative to the U.S. dollar, as well as tight labor market conditions.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies. Although inflation is likely to gradually moderate over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. In response, central banks around the world have been tightening policy faster than previously expected. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers (figure 1.1.B).

Fiscal space has narrowed considerably, and concerns over debt sustainability in many countries have risen as global financial conditions have made it more difficult to service debt loads that have accumulated rapidly in recent years, particularly during the pandemic. Nonetheless, many governments have announced new support measures to shield households and firms from the effects of sharply rising prices, slowing the pace of fiscal consolidation as pandemic-related stimulus is withdrawn.

Most commodity prices have eased, to varying degrees, largely due to the slowdown in global growth and concerns about the possibility of a global recession. By historical standards, however, they remain elevated, prolonging challenges associated with energy and food insecurity. Crude oil prices have steadily declined from their mid-2022 peak; meanwhile, natural gas prices in Europe soared to an all-time high in August but have since fallen back toward pre-invasion levels. Non-energy prices, particularly metal prices, have declined alongside weak demand. While food prices have eased from earlier peaks, food price inflation remains very high in some EMDEs.

Against this backdrop, global growth is forecast to slow to 1.7 percent in 2023 (figure 1.1.C). This pace of growth would be the third weakest in nearly three decades, overshadowed only by the global recessions caused by the pandemic in 2020 and the global financial crisis in 2009. This forecast is 1.3 percentage points lower than in June, largely reflecting more aggressive monetary policy tightening, deteriorating financial conditions, and declining confidence. Growth projections have been downgraded for almost all advanced economies and about two-thirds of EMDEs in 2023, and for about half of all countries in 2024 (figure 1.1.D). Global trade is also expected to slow sharply alongside global growth, despite support from a continued recovery in services trade. Downgrades to growth projections mean that global activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon, with EMDEs accounting for most of the shortfall from trend (figure 1.1.E). This suggests that the negative shocks of the past three years—namely the pandemic, the invasion of Ukraine, and the rapid increase in inflation and associated tightening of monetary policy worldwide—are having a lasting impact on economic prospects.

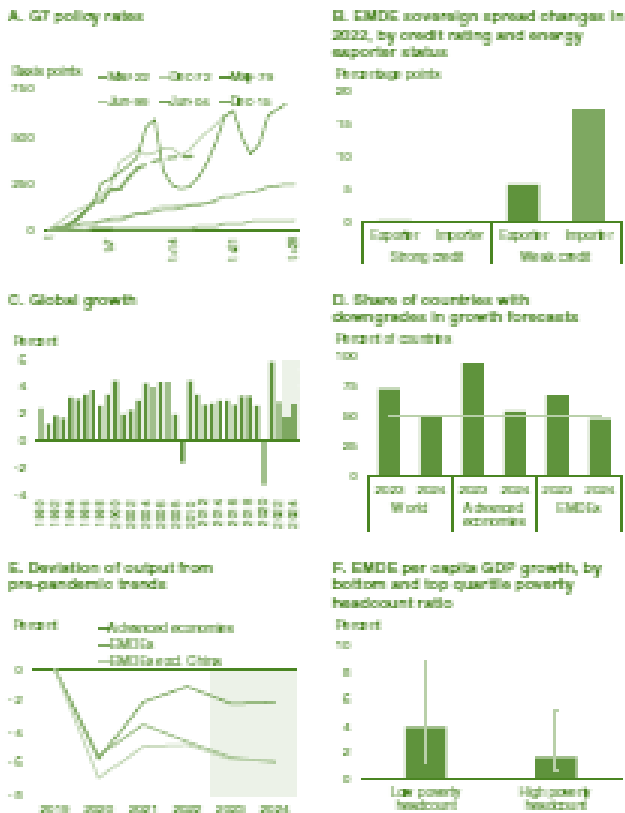

In advanced economies, conditions have deteriorated sharply, owing to declining confidence alongside high inflation and rapid monetary policy tightening. In the United States, one of the most aggressive monetary policy tightening cycles in recent history is expected to slow growth sharply. The euro area is also contending with severe energy supply disruptions and price hikes associated with the Russian Federation's invasion of Ukraine. In all, growth in advanced economies is forecast to slow from 2.5 percent in 2022 to 0.5 percent in 2023.

In EMDEs, growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent. The downward revision results in large part from weaker external demand and tighter financing conditions. EMDE growth is anticipated to remain essentially unchanged in 2023 relative to last year, as a pickup in China offsets a decline in other EMDEs. Excluding China, EMDE growth is forecast to decelerate from 3.8 percent in 2022 to 2.7 percent in 2023 as significantly weaker external demand is compounded by high inflation, tighter financial conditions, and other domestic headwinds. The deviation between EMDE investment and its pre-pandemic trend is expected to remain substantial. EMDE investment growth is envisaged to remain below its 2000-21 average pace, dampened significantly by weakening activity, heightened uncertainty, and rising borrowing costs. Low-income countries (LICs) are expected to grow 5.1 percent in 2023, with forecasts downgraded in about 65 percent of countries. Cost-of-living increases and a deterioration in the external environment are weighing heavily on activity in many LICs and compounding weakness in LICs with fragile and conflict affected situations (FCS).

As a result of the sharp slowdown in global growth, per capita income is not expected to surpass 2019 levels until at least 2024 in about one-third of EMDEs. Per capita income growth is expected to be slowest where poverty is highest (figure 1.1.F). In Sub-Saharan Africa—which accounts for about 60 percent of the world's poor—growth in per capita income over 2023-24 is forecast to average only 1.2 percent, far less than the pace that would be needed over the remainder of the decade to reach a 3 percent poverty rate by 2030.

FIGURE 1.1 Global prospects

High global inflation has prompted rapid, synchronous monetary tightening. This has contributed to worsening financial conditions, particularly for less creditworthy emerging market and developing economies (EMDEs). Global growth in 2023 is expected to be the third weakest in nearly three decades, overshadowed only by global recessions. Most country forecasts have been downgraded. The recovery from the pandemic recession is far from complete, especially in EMDEs, and the per-capita income outlook is particularly subdued for poverty-stricken countries.

Global Trade

Global trade growth decelerated in the second half of 2022, in tandem with deteriorating activity in major economies. Weakening trade mirrored the slowdown in global industrial production, as demand shifted toward its pre-pandemic composition and away from goods. Despite this moderation, goods trade surpassed pre-pandemic levels last year; meanwhile, services trade continued to recover, supported by the gradual shift in demand toward services. Tourism flows rebounded as many countries eased travel restrictions but remained well below pre-pandemic levels and uneven across regions (WTO 2022).

Global Inflation

Inflation rose throughout 2022 in almost all economies. Median global headline inflation exceeded 9 percent in the second half of the year, its highest level since 1995. Inflation reached almost 10 percent in EMDEs, its highest level since 2008, and in advanced economies just over 9 percent, the highest since 1982. Inflation was above target in virtually all countries that have adopted inflation targeting.

Soaring inflation in 2022 reflected a combination of demand and supply factors (Ha, Kose, and Ohnsorge 2022; Shapiro 2022). On the demand side, the acceleration of growth during the initial rebound from the 2020 global recession, as well as the lagged effects of earlier macroeconomic support, contributed to persistent price pressures. Price increases were particularly large in sectors such as shipping and air travel, where compositional shifts in demand encountered ongoing capacity constraints and supply chain disruptions (Kalemi-Özcan et al. 2022). On the supply side, shortages of key commodities, exacerbated by Russia's invasion of Ukraine, contributed substantially to higher energy and food prices. In some countries, tight conditions and mismatches in labor markets further added to rising wages and higher input and production costs. Finally, many countries experienced large currency depreciations that passed through into higher import, producer, and consumer prices. The higher share of food in consumer spending has caused inflation to accelerate more in low-income countries compared to other EMDEs.

INDIAN ECONOMY

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has

also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world’s second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may

prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localized lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimizing the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

India’s Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India’s underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

Figure I.17: India growth projections by various agencies for FY23

Source: Various Agencies

Note: ADB stands for Asian Development Bank, IMF is International Monetary Fund

India's economic resilience can be seen in the domestic stimulus to growth seamlessly replacing the external stimuli. The growth of exports may have moderated in the second half of FY23. However, their surge in FY22 and the first half of FY23 induced a shift in the gears of the production processes from mild acceleration to cruise mode. Manufacturing and investment activities consequently gained traction. By the time the growth of exports moderated, the rebound in domestic consumption had sufficiently matured to take forward the growth of India's economy. Private Consumption as a percentage of GDP stood at 58.4 per cent in Q2 of FY23, the highest among the second quarters of all the years since 2013-14, supported by a rebound in contact-intensive services such as trade, hotel and transport, which registered sequential growth of 16 per cent in real terms in Q2 of FY23 compared to the previous quarter.

Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November 2022, as indicated by Motilal Oswal's Economic Activity Index. The index estimates that private consumption grew at a five-month high pace of 5.6 per cent YoY, driven by auto sales and broad-based expansion of services.

Industry – Renewable Energy

Executive Summary

1. Immense Growth Potential

India has low conventional energy resources compared to its required energy needs driven by a huge population and a rapidly increasing economy. However, India can harness the huge potential of solar energy as it receives sunshine for most of the year. It also has vast potential in the hydro power sector which is being explored across states, especially in the northeast.

As of November 2022, India's installed renewable energy capacity (including hydro) stood at 165.94 GW, representing 40.6% of the overall installed power capacity and providing a great opportunity for the expansion of green data centers. India is the only country among the G20 countries who is on track to achieve its targets under the Paris Agreement. ICRA expects renewable energy capacity addition of 12.5 GW in FY22 and 16 GW in FY23.

2. Ambitious Targets

In November 2021, at the Cop-26 Summit in Glasgow, Prime Minister Mr. Narendra Modi made a promise to increase India's renewable energy generation capacity to 500 GW, and meet 50% of India's energy needs through renewable means by the year 2030.

The non-hydro renewable energy capacity addition stood at 4.2 GW for the first three months of FY23 against 2.6 GW for the first three months of FY22.

3. Increasing Investment

The non-conventional energy space in India has become highly attractive for investors and received FDI inflow of US\$ 12.57 billion between April 2000- June 2022. More than Rs. 5.2 lakh crore (US\$ 70 billion) has been invested in India’s renewable energy sector since 2014. India ranked third on the EY Renewable Energy Country Attractive Index 2021.

Advantage India

1. Robust Demand

In June 2021, Prime Minister Mr. Narendra Modi stated that the renewable energy capacity in India increased by 250% between 2014 and 2021 and the country ranks among the top five globally in terms of installed renewable energy capacity.

The Central Electricity Authority (CEA) estimates India’s power requirement to grow to reach 817 GW by 2030.

As the economy grows, the electricity consumption is projected to reach 15,280 TWh in 2040 from 4,926 TWh in 2012. Most of the demand will come from the real estate and transport sectors.

2. Competitive Advantage

India was ranked fourth in wind power, fifth in solar power and fourth in renewable power installed capacity, as of 2020.

Power generation from solar and wind projects are likely to be cost-competitive relative to thermal power generation in India in 2025-2030.

As per the British Business Energy, India ranks third on renewable energy investments and plans.

3. Policy Support

On November 9, Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman, approved the final Sovereign Green Bonds framework of India. The Paris Agreement's Nationally Determined Contribution (NDC) targets will be further strengthened by this approval, which will also aid in attracting foreign and domestic capital to green projects.

The core idea of AHASolar to work in the space of Climate Change, Renewable and Digital space.

Our primary focus in renewable energy has been in solar industry and to cater it we developed an AI based intelligent Solar Digital Platform. We have developed Software as a Service (SaaS) products for solar companies to streamline the processes, design PV, do project management and monitor generation alongwith an integrated Marketplace to connect the demand & supply digitally. Apart from this, another SaaS product is for the governments to implement the distributed renewable programme in their services area.

Our Core business can be divided in following categories:

- a) Solar Software Service
- b) Solar Marketplace
- c) Solar Advisory and Consultancy Service

Our company is also involved in the business of Advisory for sustainable development and energy transition to renewables. Our key expertise include:

1. Software and Advisory on Process Management
2. Software related to solar EPC company for PV design, project management, procurement, monitoring, ERP, CRM
3. Solar Project Management
4. Advisory on policy and regulation related to renewable energy
5. Transactional Advisory on transformation of companies, cities and states to renewables
6. E-commerce for solar products
7. Drone Surveys
8. Automation

Since our inception, we have been working with multiple national, international, government and private companies in enabling them to accelerate the adoption of solar through our solutions. In terms of software sales we are providing our services to Solar companies, Original Equipment Manufacturers and the governments and in terms of advisory we have been rendering our services to Solar EPC Companies and Corporate Consultancy Firms on Solar Project Management and Solar Plant Audits. We have two SaaS products namely,

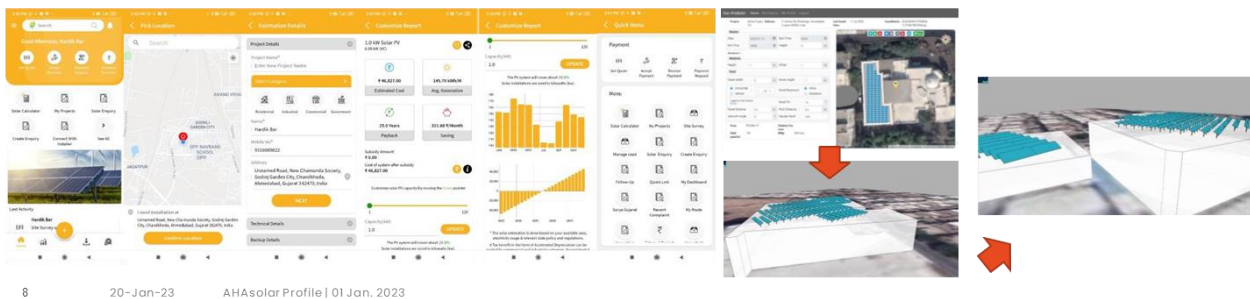

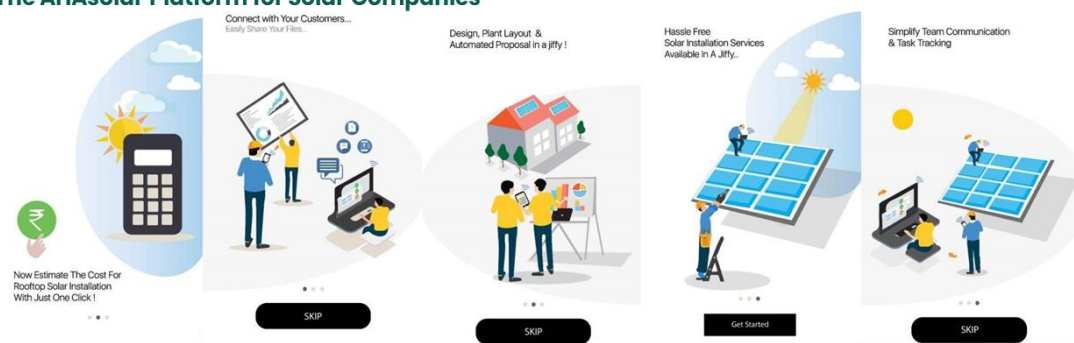

1. For Government Agencies: AHASolar Unified Portal

2. For Solar Companies: AHAsolar Helper and Sun Analyzer

We have developed the Unified Single Window Solar Portal (the “Portal” or “**AHAsolar Unified Portals**”) for multiple states nodal agencies like Gujarat Energy Development Agency (GEDA), Gujarat Urja Vikas Nigam Limited (GUVNL), Goa Energy Development Agency (Goa EDA), Jammu & Kashmir Energy Development Agency (JAKEDA), etc. The Portal developed for GUVNL and GEDA are, and other states are one of its kind and one of highest performing such portal in the country. The Portal of GUVNL and GEDA are connected to more than 800 DisCom offices in Gujarat with 2000+ solar companies along with multiple State and Government of India Portals. This Portal has processed solar rooftop solar applications for more than 1800 Mega Watts helping mitigate 63000 ktons of CO₂. The portal connects solar rooftop installers with Government to avail subsidy benefits seamlessly and to distribution companies to identify best possible service provider for their needs.

The second SaaS product i.e., **AHAsolar Helper**. The AHAsolar Platform for Solar Companies

Our Company realizes that clients have specific requirements with regards to their solar projects. We therefore have created an ecosystem which allows them to find a perfect IT solution for their solar project. Since our incorporation, our major focus has been on our software division to accelerate the adoption of solar and thereafter Solar Marketplace to remove organize the buying and selling solar products. Thereafter, Advisory vertical is a strategic vertical, helping the organization to stay connected with the policy, regulations and giving strategic advantage.

AHA Marketplace has resolved the problem related to the identification of a right solution for the distributed solar PV. The solar PV installation industry is unorganized and there is a supply chain gap between installers of solar PV plants and the manufacturers of Solar PV equipment. To resolve this issue, in the year 2021 we developed an integrated Marketplace called “AHA Marketplace”, where sellers and buyers of solar equipment can effectively connect and do business.

AHA Marketplace provides a data driven process to buy and sell products at a single Platform and it is completely changing the market. Now, even small and mid-size MSME companies are having a power of data driven analytical approach to manage, buy and sell solar products. Today, we live in a world where most people do all their purchasing online and even businesses are getting into the marketplace sector, as they are finding full-time employees to fill work positions and freelance workers to fill in the gaps with temporary work advantages.

The biggest key factor is Technology. The tech world has allowed marketplaces to expand into areas around the world, allowing gig workers to market their services to a business in their nearby location and to areas across the country. Freelancers can easily find work for the number of hours, skill level and pay rate that best fits into their schedules and preferences.

With technology, AHAsolar marketplace platform is gathering real-time analytics and empowering the solar installers to go for the more informed and profitable buying and along with this increasing the marketing reach for manufacturers and distributors. This process helped to increase our user engagement and to provide a more pleasing, interactive experience which ensured that our customer returns to do business again with both the AHAsolar Marketplace and our seller.

Through our advisory services, we have our footprints across India and currently working with 38 cities to transform them to solar cities and enable the growth of solar namely in Gujarat, Punjab, Uttar Pradesh, Goa, Maharashtra, Telangana, Utrakkhand, Jharkhand, Delhi/NCR, Odisha, Karnataka, Kerala, J&K, etc.

b) Sun Analyser

Sun Analyzer is a PV design software developed solar PV Industry do shadow analysis. Shading analysis is a very crucial step in finalizing Solar Panel locations in distributed Photovoltaic (PV) solar installation. The extent of the area required by a solar PV plant is a factor of panel efficiency and extent of shading. Any kind of shading is detrimental to the performance of the entire solar PV plant. Solar panels are mostly arranged in strings to meet voltage requirements. The Sun Analyzer software, simulate the shadows on roof for any day of the year and record impact of shading caused by parapet walls, water tanks, exhaust vents, panel shading, trees, etc. The extent of the rooftop area required by a solar PV plant is a factor of panel efficiency and extent of shading.

Following are the glimpse of the app and its key features:

c) Process Management Software / Portals for Government:

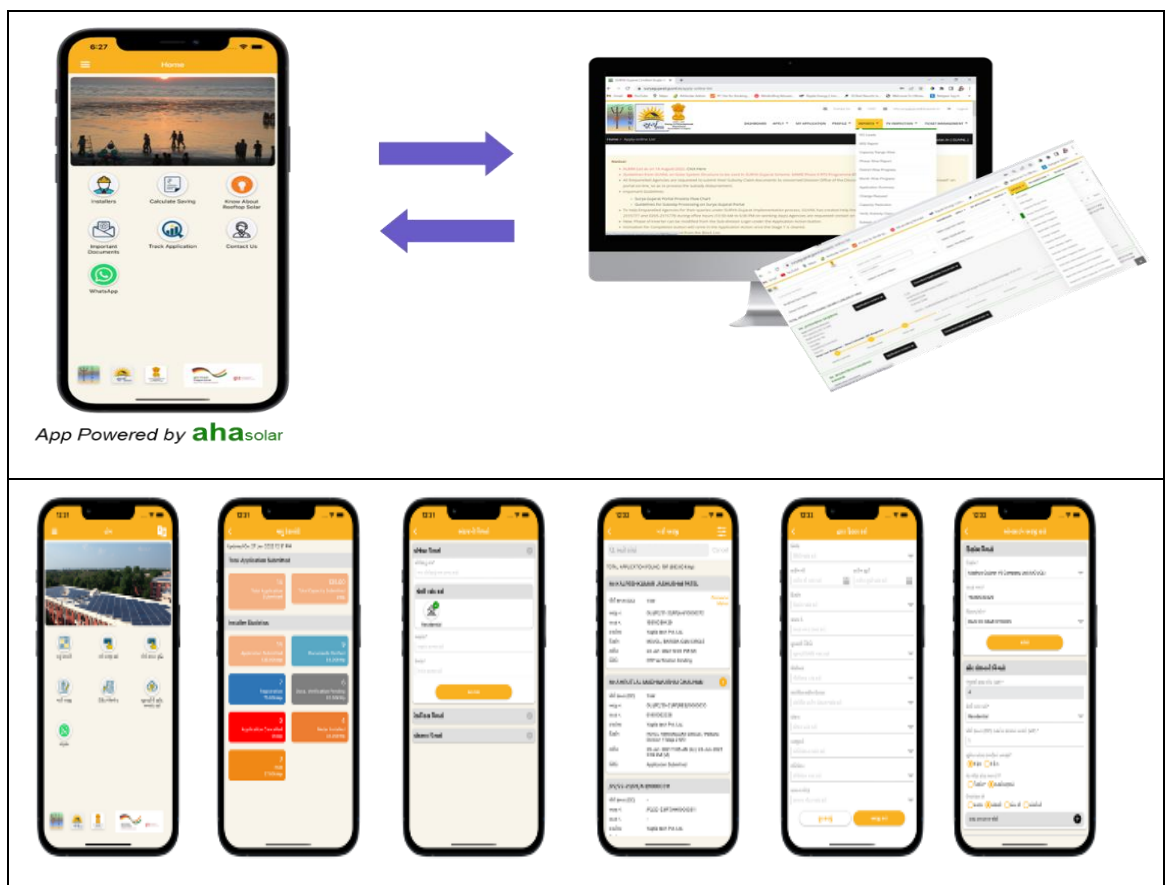

i. Unified Single Window Portal for Government Agencies like GEDA, GUVNL, etc.

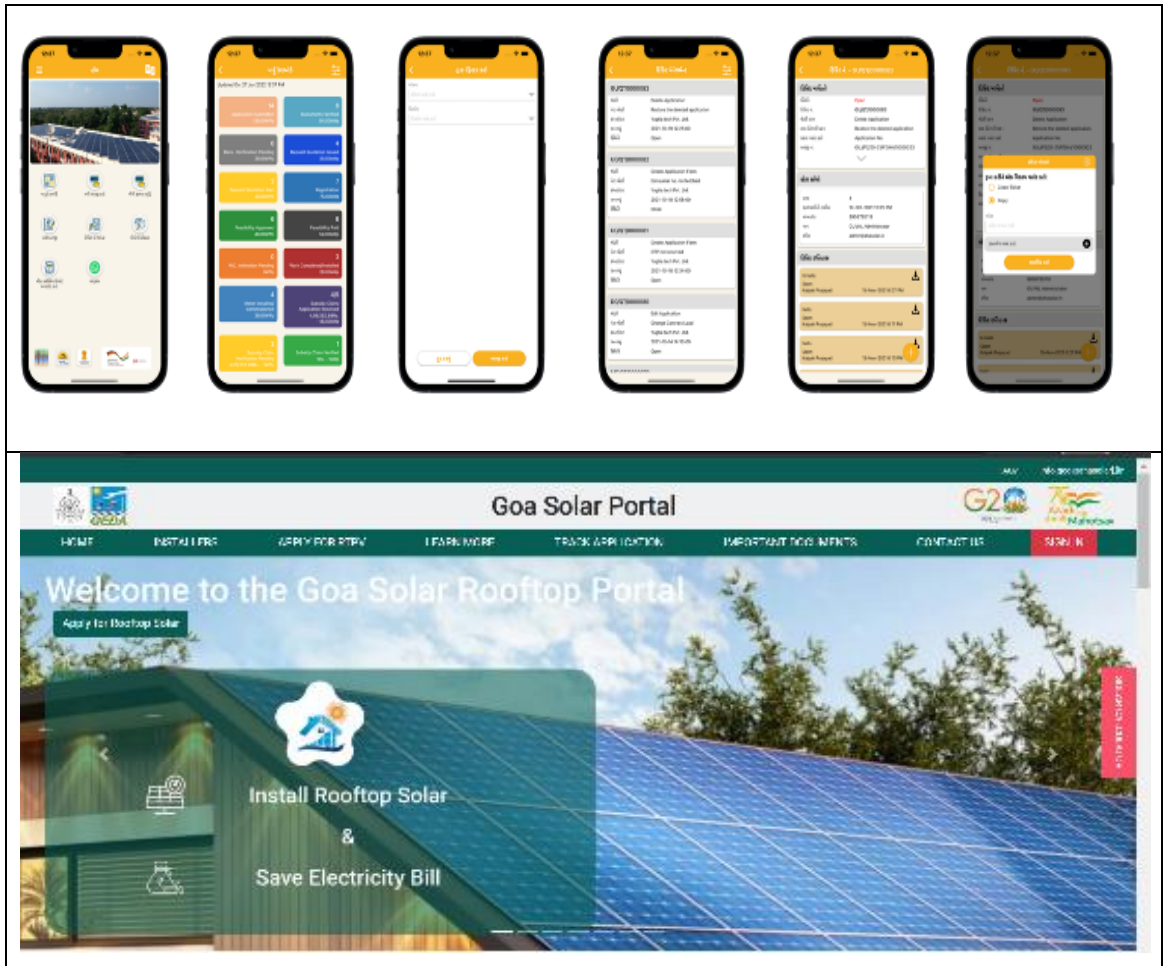

AHASolar has worked with multiple state governments, Government of India, Development Corporations to implement solar program in their multiple states and currently associated with the following 6 (six) State Nodal Agencies and DisComs for the Grid Connected Solar PV Programme. AHASolar has developed Unified Portals for managing the rooftop solar programme.

AHASolar Software provided to Discoms of Gujarat for the implementation of Rooftop solar has resulted in Gujarat becoming biggest rooftop solar implementing state with fully automated processes and as the India’s best performing Rooftop Solar implementation state. This is also World’s Largest Rooftop Solar Programme which is implemented ground with the use of Unified Portal developed by AHASolar.

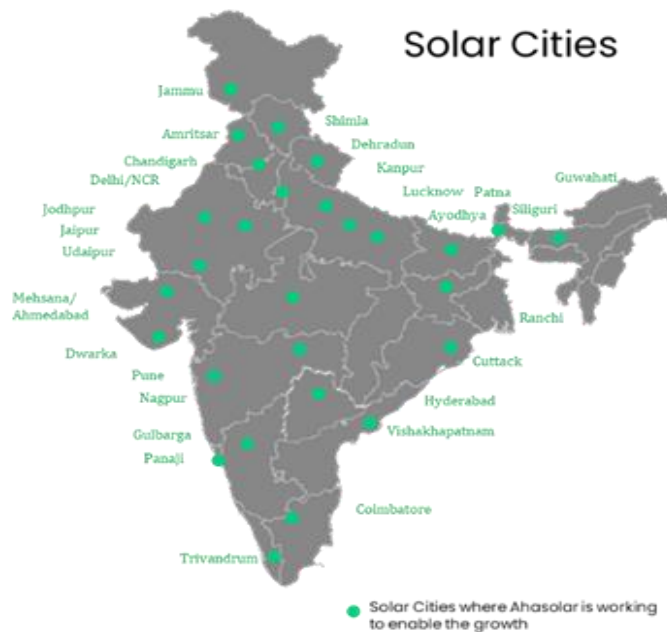

We have developed the Unified Single Window Solar Portal (the “Portal”) for multiple states nodal agencies like Gujarat Energy AHASolar Unified Portals Development Agency (GEDA), Gujarat Urja Vikas Nigam Limited (GUVNL), Goa Energy Development Agency (Goa EDA), Jammu & Kashmir Energy Development Agency (JAKEDA), etc. The Portal developed for GUVNL and GEDA are and other states are one of its kind and one of highest performing such portal in the country. The Portal of GUVNL and GEDA are connected to more than 800 DisCom offices in Gujarat with 2000+ solar companies along with multiple State and Government of India Portals. This Portal has processed solar rooftop solar applications for more than 1800 Mega Watts helping mitigate 63000 ktons of CO2. The portal connects solar rooftop installers with Government to avail subsidy benefits seamlessly and to distribution companies to identify best possible service provider for their needs.

We developed Portal called “Surya Gujarat Rooftop Solar Portal”. In consultation with GUVNL and DisComs in streamlining the process of Rooftop Solar Application and Disbursement of Subsidy for Residential Rooftop Solar in the State of Gujarat. The following is a flowchart and other images to give the Surya Gujarat Portal:

We are currently assisting 38 cities, in consultation with respective City Nodal Agencies, Electricity Utility Authorities and Municipal Corporations to do energy transition to renewables and accelerate the adoption of solar energy at the city level. The overall target of the work is to grow the distributed solar market in all these regions and for this, we have also prepared a City level Solar Atlas for aggregating the demand. The Solar Atlas uses Sun Analyzer software to aggregate the solar potential on the roofs, and ground in the city level using satellite and drone images and providing the Solar PV potential that can be installed. The Solar Atlas helps the consumers to quickly identify the potential and install solar and administrators to monitor the progress of the adoption. The following figure are an illustrative list of the cities.

3. AHASolar Marketplace

AHASolar has resolved the problem related to the identification of the right solution for solar PV rooftop. However, the solar PV installation industry is unorganized, as off now. There is a supply chain gap between installers of solar PV plants and the Manufacturers of Solar PV equipment. To resolve this issue, in the year 2021 we developed an integrated Market Space called “AHA Market” or “AHASolar Marketplace”, wherein sellers and buyers of solar equipment can effectively connect and do business.

AHASolar Marketplace provides a data driven process to buy and sell products at a single Platform and it is completely changing the market. Now, even small and mid-size MSME companies are having a power of data driven analytical approach to manage, buy and sell solar products. Today, we live in a world where most people do all their purchasing online and even businesses are getting into the marketplace sector, as they are finding full-time employees to fill work positions and freelance workers to fill in the gaps with temporary work advantages.

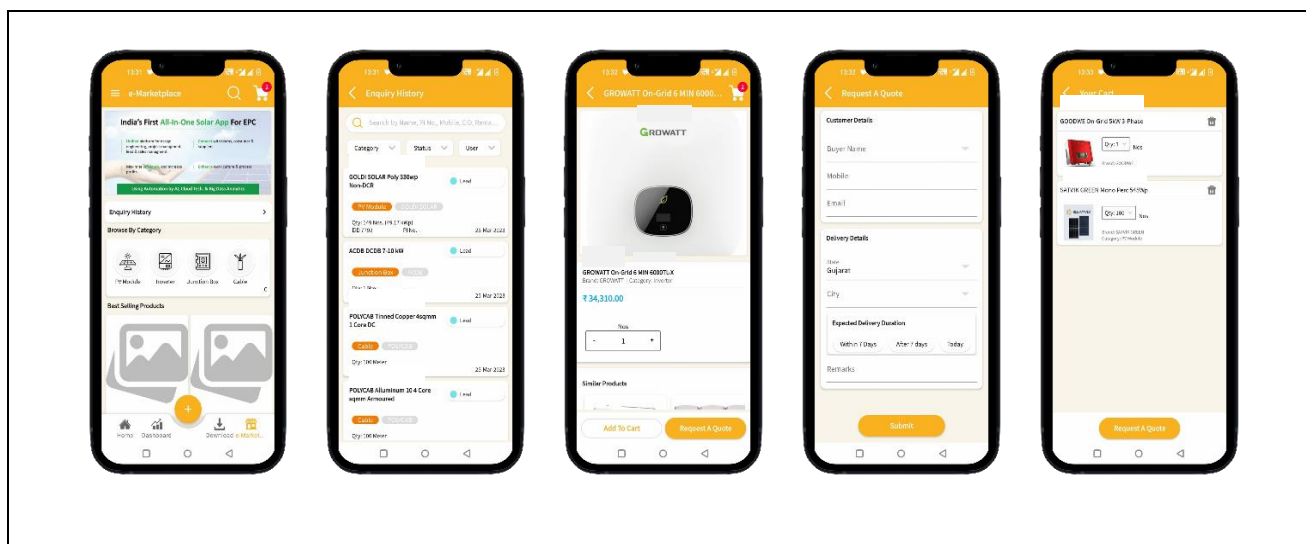

The biggest key factor is Technology. The tech world has allowed marketplaces to expand into areas around the world, allowing gig workers to market their services to a business in their nearby location and to areas across the country. Freelancers can easily find work for the number of hours, skill level and pay rate that best fits into their schedules and preferences.

With technology, AHASolar marketplace platform is gathering real-time analytics and empowering the solar installers to go for the more informed and profitable buying and alongwith this increasing the marking reach for manufacturers and distributors. This process helped to increase our user engagement and to provide a more pleasing, interactive experience which ensured that our customer returns to do business again with both the AHASolar Marketplace and our seller.

On the AHA Market, we sell solar related products and services through registered vendors. The following is list of products and services on the AHASolar Marketplace on the AHA Solar mobile app.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.
